Version 2.0 Release

Listed below are changes or updates from the previous version release. If you have questions or need assistance with any of the updates call us at 217-347-5242.

As part of your annual license and support fee, these changes have no additional cost to you!

NEW! New Administration Interface

This product was rewritten in the most current programming technology providing more flexibility for enhancements. The system administration management interface has a new look that is cleaner and easier to use.

- There is a new maintenance screen for Supervisor and Employee menu options allowing a company to custom display the active features.

NEW! Supervisor control of time cards

A Supervisor can sign employee time cards, void time entries and create new time entries, without the need to log on as an employee.

- The original data is not lost. Supervisor changes require the original entry to be voided and create a new entry so all original records remain intact.

NEW! Overnight Clock Outs

The system allows employees to clock in one day and clock out the next. This is great for third shift employees.

NEW! Miscellaneous Enhancements

- Export of Time to CSV File
- Bulletin Board can display messages at the employee login screen. Great place to leave tips for the day, holiday reminders, safety notices, etc.
 - NOTE: This message board is not protected inside the login, so confidential information should not be displayed in this location.
- Employee Number, Department Number fields added

NEW! Security Enhancements

- Log of Invalid Login Attempts
 - System will delay progressively longer for each invalid login attempt.
- I.P. addresses can be restricted as an added security measure

UPDATED! Maintenance

- Holiday Maintenance
 - allows you to pick a NEW holiday for position groups
 - date can be entered and edited
 - allows you to enter specific hours allowed for paid holiday
- All reports run faster
